

## Letter Section

---

In a recent issue of the Journal of Computational and Applied Mathematics there appeared an article by S.N. Hanna entitled “Stability of periodic plane wave solutions of wave equations” (*J. Comput. Appl. Math.* **34** (1) (1991) 41–46). This article is substantially copied from an earlier article by P.K. Newton and J.B. Keller entitled “Stability of periodic plane waves”, *SIAM J. Appl. Math.* **47** (5) (1987) 959–964.
